

Sarah Kiden

Sarah Kiden is a technologist and researcher, interested in how technology and society intersect. She has researched and worked on projects that build, deploy, train and advocate for technology solutions and meaningful Internet access for grassroots communities.

She is currently a Marie Curie Research Fellow, advocating for connected products that are more open, secure and trustworthy, through the Open Design of Trusted Things (OpenDoTT) programme at the University of Dundee and Mozilla Internet of Things (IoT) Studio. Prior to this, she was a 2017-2018 Ford-Mozilla Open Web Fellow, hosted by Research ICT Africa and working on Internet measurements.

She volunteers with Internet Society and ICANN's At-Large Advisory Committee (ALAC), representing interests of Internet end-users.
